

Amount that could have been saved by 100% Seat Belt Use in 2003: \$265,707,539

Insurance companies could have saved nearly \$1.5 million dollars, the Idaho State government could have saved over 7.6 million dollars, the Federal government could have saved nearly \$16.8 million if everyone in Idaho had just worn their seat belt. These costs are passed on to the general public through insurance premiums and taxes.
